KEGEL KICKER MATERIAL

25 FOOT ROLL

162-7000

This Kegel Kicker Material comes in 25' rolls with 3M[®] self-adhesive backing. Easily install this to the ball wheel.

THE DEVIATOR™

BALL WHEEL TENSIONER KIT

162-8400

The patented Deviator™ Ball Wheel Tensioner Kit will greatly reduce ball damage caused by pins being lodged between the ball and the lift rods.

Eliminate premature belt wear by placing the ball wheel belt in a less stressful environment, which also gives you the ability to easily fine-tune the ball wheel belt tension.

SPEED REDUCTION KIT

162-8100

PARTS FOR A-2 MACHINES

PIN WHEEL BRAKE LINING

PPP-PWBL

Install without removing worn brake. Slide new steel lining between belt and worn brake and secure.

PIN WHEEL WIPER CUSHIONED SPRING SUPPORT

PREFERENCE SYSTEM KIT

162-8078

The Kegel Preference System Kit is designed to alleviate the headaches associated with the Brunswick® A-2 and Jet Back pinsetters. Minimize the problems caused by the factory design in a reasonably priced, easy to install, low maintenance kit.

This kit eliminates 12 individual parts of the OEM assembly that when not regularly maintained and adjusted will eventually fail.

Our UHMW preference actuator is a low maintenance, low wear portion of the kit. The simple design eliminates the OEM spring rod bumper.

A powerful magnet is used to create a positive locking and unlocking of the preference system kit.

PARTS FOR GS[®] MACHINES

SHARK TRANSITION CAM

163-6008

Our Shark Transition Cam provides a gentler angle for the pin to transfer between the shark and distributor belts. The head of the pin strikes the Shark Transition Cam instead of the side rail of the distributor, allowing it to absorb most of the rebound. Sold in a set of two cams with hardware. Use one set per pinsetter.

CROSSOVER WEDGE

163-8011

Due to the gap between the pin and the side plates in the crossover area, the pin is likely to have an inconsistent transfer when changing directions. We have solved this problem with this Crossover Wedge. Much like our Shark Transition Cam, the Crossover Wedge facilitates a smooth transfer around the bend. Sold in a set of two wedges with hardware. Use one set per pinsetter.
